### **Safway Services, Inc. Awarded Suspended Scaffolding Contract for Golden Gate Bridge**

*Contract Signed with the Golden Gate Bridge Highway and Transportation District*

WAUKESHA, WI – Dec. 22, 2006 – Safway Services, Inc., announced today it has signed a contract with the Golden Gate Bridge Highway and Transportation District to provide its QuikDeck™ suspended access system for the Golden Gate Bridge in San Francisco. The system will be used by Bridge workers to perform various ongoing maintenance tasks on the famed span.

The QuikDeck access system is a suspended modular platform decking system used in bridge construction/repair, shipyards, offshore rigs, atriums, temporary stages and many other uses.

The system offers ease of installation, safe and stable platform, and work load capacity. Additionally, the QuikDeck system provides full containment for cleaning and painting, a requirement of environment and air quality regulations.

“As Safway’s newest division, we are very pleased to have been selected to provide our QuikDeck suspended platform to the Golden Gate Bridge District. We feel that our participation in this exciting and important project on one of our country’s most recognized landmarks will allow us to demonstrate the quality of our product and our experience in engineering, design, and training services,” said Larry Mickwee, Safway Bridge Division vice president and general manager.

#### **About Safway Services, Inc.**
