# Safway Tracking System

## Web-based Scaffold Management

## What gets measured gets managed. What gets managed gets results.

You know that efficiently managing your scaffolding is crucial to the success of your project. How are you tracking your scaffold equipment and labor costs? Can you analyze your site management? What can you do to lower your total installed cost?

### A Project Management Tool

The Safway Tracking System is an exclusive scaffold management system that captures and generates real-time data about your project's equipment, labor and productivity.

Whether you're attempting to meet a tight turnaround deadline or complete a complex maintenance project, this web-based scaffold management tool can help:

- Increase productivity
- Better manage project time table
- Manage your modifications and better utilize inventory
- Control your project costs

The system is flexible, so it can easily be incorporated to match your current reporting structure and software.

### Bottom Line Results

When you're managing a complex capital or maintenance project, you need up-to-date information on your productivity.

Detailed, real-time answers to your site productivity, budget, inventory and labor management are at your fingertips.

The system takes your project information and transforms it into valuable reports on your use of scaffold, including:

- On-site scaffold productivity
- Types of scaffold utilized and where
- Scaffold location
- Total man hours/employees' daily time
- Total scaffold costs per area
- How long scaffold has been erected
